Subject: Treatment Beneficial Use Market Survey
Date: 05/21/2009 02:55 PM

Chip & Eric,

Tom G & I reviewed the LWG's 4/3/09 draft "*Treatment Beneficial Use Market Survey*". The report looks good & we don't have any substantive comments, but we did want to offer 2 suggestions:

- 1) Another use of natural aggregates (Section 2.3.1) could be for asphalt mixtures.
- 2) One thing the report didn't consider was the use of partially treated material. For instance, if dredged sediment was treated..., but still contained low levels of contamination..., & further treatment would be infeasible or cost prohibitive..., is there a beneficial use of the material that is still protective of human health & the environment? Perhaps this partially treated material could be used in asphalt mixtures or concrete.

Jim Anderson
